Ajikumar Parayil Ph.D

Founder & CEO, Manus Bio

Aji Parayil is an entrepreneur with more than 20 years of experience in technological innovation and commercialization. He is the co-founder & CEO of Manus Bio Inc. and co-founder of Mirakel Technologies Inc. He invented Manus Bio's core technology platform at MIT, launched Manus Bio in 2011, and pioneered several novel methods for engineering chemistry using biology for bio-manufacturing of natural products. Aji has more than 150 U.S. & international patents issued and/or filed and has co-authored more than 60 publications in the area of biotechnology and chemical biology. Aji obtained his PhD from Mahatma Gandhi University, India and carried out his post-doctoral research at the Singapore-MIT Alliance, Singapore and the Massachusetts Institute of Technology. He developed and pioneered several novel methods for engineering chemistry using biology for biomanufacturing of natural products. Aji is an elected fellow of the American Institute of Medical and Bioengineering (AIMBE) and serves as an Advisory Board Member of the Alternative Fuels and Chemicals Coalition (AFCC).
