

The workshop focuses on a synthesis of aesthetic, sociological, and psychological domains as it is developed internationally within the cultural psychology framework. Through a set of conceptual instances and practical activities, the workshop offers a unique progressive exploration of the human decoration: from the body to the world. It combines plenary lectures, various tasks of decoration and group discussion that are meant to get insights into Kerala ways of ordinary living. All these activities can lead the participants towards a theoretical advancement in understanding the psychological function of temporary and permanent decorations of the self and the world around.

- Lectures on cultural psychology in everyday lives
- Seminars in small groups
- Group work with specific tasks (i.e. Body decoration, KOLAM drawing exercises etc.)

A maximum of 100 participants will be admitted on a first come first served basis. There is prior registration, but no registration fee for the Workshop. Certificates will be issued to the participants at the end of the programme. Lunch and Snacks will be provided. Those who wish to participate may write to antonymalackal@gmail.com or call 9447739189
